### ATTACHING WALL MOUNT BRACKET

Use included mounting hardware to securely mount wall bracket, hose hanger, and accessory bag to the wall. Make sure to use the proper fastener depending on the surface you are mounting the vacuum to. The vacuum is attached to the wall by hanging the vacuum vertically with the axle in the wall bracket and the wheels touching the wall.

### DUST/DIRT COLLECTION BAG REPLACEMENT

To replace the dust collection bag, unclip the two clamps on the opposite end of the vacuum from the on/off switch. Remove end cap and discard paper bag. Remove permanent cloth bag and shake off any dust or dirt buildup that might be stuck to it. The foam charcoal filter that is located inside the vacuum should be replaced as necessary depending on usage (typically 3-4 times per year). Re-install the cloth bag, insert a new paper bag (included), re-attach the end cap, and push clamps to lock the end cap to the body of the vacuum.

### TO USE AS A BLOWER

Remove the dust collection end of the vacuum by releasing the clamps and removing both cloth and paper bags. Attach hose and desired attachment to the other end of the unit.
